EDUCATION

Boston University

B.S. in Computer Engineering; GPA: 3.97/4.00

Expected May 2028

Boston, MA

EXPERIENCE

Boston University - Prof. Brian Kulis

Undergraduate Machine Learning Researcher

Aug 2026 – Present

Boston, MA

- Researching robust human-motion retrieval by learning fixed-length embeddings from temporal 2D/3D pose sequences and comparing metric-learning objectives with Recall@K and mAP under noise, occlusion, temporal jitter, and viewpoint shift.

Banca Mediolanum

Software & AI Engineering Intern, Customer Knowledge

Jun 2026 – Aug 2026

Milan, Italy

- Owned architecture and implementation of an internal AI-agent platform spanning Databricks model serving, enterprise chat, and prompt/evaluation workflows.
- Built a LangGraph/MLflow runtime with governed SQL, citation-backed retrieval, request-scoped context, typed contracts, evidence review, and tracing.
- Delivered substantially lower end-to-end latency than Databricks Genie across multi-step, multi-domain benchmarks while maintaining identical accuracy.
- Joined executive meetings across IT, finance, marketing, and advisory functions, recommending architectures for performance, feasibility, system design, operations, and cross-department data/resource requirements.

Boston University College of Engineering

Undergraduate Machine Learning Researcher

Jan 2026 – May 2026

Boston, MA

- Built a Python biomechanics pipeline spanning video stabilization, MMPose 2D keypoints, MotionBERT 3D lifting, stroke segmentation, and per-frame and stroke-averaged kinematics.
- Engineered a video-to-telemetry alignment system using calibrated stroke detection and dynamic-programming sequence matching to create synchronized pose-force datasets for sequence-model training, validation, and evaluation.

Societa Cappelletto S.r.l.

Software Engineer

May 2025 – Oct 2025

Treviso, Italy

- Rebuilt an Electron inventory application in Tauri, React, and Rust, reducing application size by 70%, memory use by 80%, startup time by 60%, and Shopify inventory-search latency by 43%.
- Implemented concurrent Shopify GraphQL search, multi-location inventory reconciliation, Firebase audit history, GitHub Releases distribution, and automatic application updates.

TickIT GmbH

Frontend & Backend Engineer

Nov 2024 – Feb 2025

Remote

- Built Ruby backend services and Next.js/TypeScript interfaces across a 150,000-line event-ticketing platform as part of a four-engineer remote team.
- Implemented QR ticket generation and validation, purchasing and sharing flows, and organizer dashboards for spending analytics, forecasting, operational metrics, and event-cost planning.

SELECTED PROJECTS

BU Rowing Training Platform | GitHub

Next.js, Supabase, Prisma

- Built and deployed a mobile-first platform for 50 BU athletes and coaches with role-based access, proof-validated workout logs, leaderboards, reporting, and automated weekly email summaries.

NoteWorthy | GitHub

Next.js, Gemini, Docker, Cloud Run

- Built and deployed a multimodal notes-to-LaTeX workflow with OAuth, streamed generation, configurable HTTP compilation, and PDF/source export across Vercel and a Dockerized Cloud Run service.

LEADERSHIP & ATHLETICS

Boston University Men's Rowing | NCAA Division I Student-Athlete | Sep 2024 – Present

- Freshman Student-Athlete of the Year (2025); Most Improved Oarsman (2026).

SKILLS

Languages: Python, TypeScript/JavaScript, SQL, Rust, C/C++, Ruby, Java

Software: React, Next.js, FastAPI, Node.js, Flask/Dash, Ruby on Rails, Tauri, Git, Docker

AI/Data: PyTorch, TensorFlow/Keras, LangGraph, MLflow, Databricks, PostgreSQL, Supabase, MMPose, MotionBERT
