EDUCATION

Boston University

B.S. in Computer Engineering; GPA: 3.97/4.00

Expected May 2028

Boston, MA

EXPERIENCE

Boston University - Prof. Brian Kulis

Undergraduate Machine Learning Researcher

Aug 2026 – Present

Boston, MA

- Researching metric-learning algorithms for temporal human-motion retrieval, comparing contextual, contrastive, triplet, and classification objectives with Recall@K and mAP under controlled perturbations.

Banca Mediolanum

Software & AI Engineering Intern, Customer Knowledge

Jun 2026 – Aug 2026

Milan, Italy

- Owned architecture and implementation of an internal AI-agent and data-access platform, translating business requirements into deployed, traceable workflows on Databricks.
- Built governed dynamic-SQL tools over Unity Catalog and Delta data with typed request contracts, permission-aware retrieval, citation-backed evidence, request-scoped context, and MLflow tracing.
- Developed prompt-versioning and evaluation infrastructure with append-only Delta tables, side-by-side benchmarks, LLM judging, quality controls, and React/FastAPI interfaces backed by PostgreSQL.

Boston University College of Engineering

Undergraduate Machine Learning Researcher

Jan 2026 – May 2026

Boston, MA

- Built a 2D-to-3D biomechanics pipeline with MMPose and MotionBERT to derive joint positions, angles, timing, and stroke-level kinematic features from rowing video.
- Trained sequence-to-sequence regression models to infer force curves from time-aligned 3D kinematics and validated predictions against instrumented on-water and erg telemetry.

Societa Cappelletto S.r.l.

Software Engineer

May 2025 – Oct 2025

Treviso, Italy

- Rebuilt an Electron inventory application in Tauri, React, and Rust, reducing application size by 70%, memory use by 80%, startup time by 60%, and Shopify search latency by 43%.
- Implemented concurrent GraphQL processing, multi-location reconciliation, Firebase audit history, and automated release and update workflows.

TickIT GmbH

Frontend & Backend Engineer

Nov 2024 – Feb 2025

Remote

- Built core Ruby services and Next.js/TypeScript interfaces across a 150,000-line platform as part of a four-engineer remote team.
- Built spending-tracking pipelines, forecasting dashboards, operational metrics, event-cost planning, and QR-based ticket purchasing and validation workflows.

LEADERSHIP & ATHLETICS

Boston University Men's Rowing | NCAA Division I Student-Athlete | Sep 2024 – Present

- Freshman Student-Athlete of the Year (2025); Most Improved Oarsman (2026).

SKILLS

Languages: Python, C/C++, Rust, SQL, TypeScript/JavaScript, Java, Ruby

Systems/Data: PostgreSQL, Databricks, Delta Lake, Unity Catalog, FastAPI, Tauri, GraphQL, Docker, Git

Modeling: PyTorch, TensorFlow/Keras, metric learning, sequence modeling, nearest-neighbor retrieval, RANSAC
