EDUCATION

Boston University

B.S. in Computer Engineering; GPA: 3.97/4.00

Expected May 2028

Boston, MA

EXPERIENCE

Boston University - Prof. Brian Kulis

Undergraduate Machine Learning Researcher

Aug 2026 – Present

Boston, MA

- Developing a PyTorch retrieval pipeline that converts temporal 2D/3D pose sequences into fixed-length embeddings, supports nearest-neighbor search, and evaluates robustness across controlled data perturbations.

Banca Mediolanum

Software & AI Engineering Intern, Customer Knowledge

Jun 2026 – Aug 2026

Milan, Italy

- Owned architecture and implementation of an internal AI-agent platform spanning model-serving infrastructure, a streaming enterprise chat application, and prompt/evaluation tooling on Databricks.
- Designed a typed LangGraph/MLflow runtime with Pydantic contracts, policy-controlled tool execution, governed dynamic SQL, citation-backed retrieval, request-scoped context, and end-to-end tracing.
- Built React/Vite and FastAPI services with SSE streaming, authenticated sessions, structured outputs, PostgreSQL persistence, human feedback, and Databricks Asset Bundle deployment.

Boston University Men's Rowing

Software Engineer

Jan 2026 – May 2026

Boston, MA

- Built and deployed a mobile-first training platform for 50 athletes and coaches using Next.js, Supabase, and Prisma, with role-based access, proof-validated logs, reporting, leaderboards, and automated weekly emails.

Societa Cappelletto S.r.l.

Software Engineer

May 2025 – Oct 2025

Treviso, Italy

- Rebuilt an Electron inventory application in Tauri, React, and Rust, reducing application size by 70%, memory use by 80%, startup time by 60%, and Shopify search latency by 43%.
- Implemented concurrent GraphQL search, real-time multi-location inventory reconciliation, Firebase audit history, GitHub Releases distribution, and automatic application updates.

TickIT GmbH

Frontend & Backend Engineer

Nov 2024 – Feb 2025

Remote

- Built core Ruby backend services and Next.js/TypeScript interfaces across a 150,000-line platform as part of a four-engineer remote team.
- Implemented QR ticket generation and validation, purchasing and sharing flows, Stripe-backed payments, and organizer analytics and forecasting dashboards.

SELECTED PROJECT

Deskinator - Autonomous Desk-Cleaning Robot

Python, Raspberry Pi

- Built a robotics autonomy stack with sensor-driven edge detection, stepper odometry, RANSAC boundary estimation, boustrophedon coverage planning, telemetry, and simulation-based evaluation.

LEADERSHIP & ATHLETICS

Boston University Men's Rowing | *NCAA Division I Student-Athlete* | Sep 2024 – Present

- Freshman Student-Athlete of the Year (2025); Most Improved Oarsman (2026).

SKILLS

Languages: Python, TypeScript/JavaScript, Rust, C/C++, SQL, Ruby, Java

Backend/Systems: FastAPI, Node.js, Ruby on Rails, Tauri, GraphQL, SSE, OAuth, role-based access control

Data/Cloud/Tools: PostgreSQL, Databricks, Supabase, Prisma, Firebase, Docker, Google Cloud Run, Vercel, Git
