EDUCATION

Boston University

B.S. in Computer Engineering; GPA: 3.97/4.00

Expected May 2028

Boston, MA

EXPERIENCE

Boston University - Prof. Brian Kulis

Undergraduate Machine Learning Researcher

Aug 2026 – Present

Boston, MA

- Building reproducible pose-retrieval experiments with structured datasets, configurable perturbations, nearest-neighbor evaluation, and automated Recall@K and mAP comparisons.

Banca Mediolanum

Software & AI Engineering Intern, Customer Knowledge

Jun 2026 – Aug 2026

Milan, Italy

- Owned an internal data-access and AI-agent platform on Databricks spanning governed SQL, document retrieval, model serving, evaluation, and user-facing applications.
- Designed typed contracts, request-scoped context, permission-aware SQL, citation-backed retrieval, PostgreSQL session state, Delta prompt versioning, continuous index synchronization, and MLflow tracing.
- Delivered substantially lower end-to-end latency than Databricks Genie across multi-step, multi-domain benchmarks while maintaining identical accuracy.
- Participated in executive meetings across IT, finance, marketing, and advisory functions, recommending architectures based on performance, feasibility, system design, operations, and cross-department data/resource requirements.

Boston University College of Engineering

Undergraduate Machine Learning Researcher

Jan 2026 – May 2026

Boston, MA

- Built a Python pipeline from rowing video to 2D keypoints, 3D skeletons, stroke segments, 1,203 aligned force-training rows, and fixed 64-by-14 kinematic tensors.

Societa Cappelletto S.r.l.

Software Engineer

May 2025 – Oct 2025

Treviso, Italy

- Rebuilt an inventory application in Tauri, React, and Rust, cutting size by 70%, memory use by 80%, startup time by 60%, and search latency by 43%.
- Implemented concurrent Shopify GraphQL search, multi-location reconciliation, Firebase audit history, and automated distribution and updates.

TickIT GmbH

Frontend & Backend Engineer

Nov 2024 – Feb 2025

Remote

- Built Ruby and Next.js systems for QR ticketing, purchase flows, spending tracking, forecasting, organizer analytics, operational metrics, and event-cost planning in a four-engineer team.

SELECTED SYSTEMS

MOVE Enterprise AI Platform

Databricks, PostgreSQL, MLflow

- Built governed execution and evidence paths across scoped SQL and document sources, typed response contracts, append-only prompt versions, tracing, evaluation, and deployment automation.

BU Rowing Training Platform | GitHub

Next.js, Supabase, Prisma

- Built role-scoped data models, proof retention and review, fixed weekly boundaries, reporting, leaderboards, and scheduled summaries for 50 athletes and coaches.

LEADERSHIP & ATHLETICS

Boston University Men's Rowing | NCAA Division I Student-Athlete | Sep 2024 – Present

- Freshman Student-Athlete of the Year (2025); Most Improved Oarsman (2026).

SKILLS

Languages: Python, SQL, TypeScript/JavaScript, Rust, Ruby, C/C++

Data: PostgreSQL, Databricks, Delta Lake, Unity Catalog, Vector Search, Supabase, Prisma, Firebase

Engineering: FastAPI, React, Next.js, GraphQL, MLflow, Docker, Google Cloud Run, Vercel, Git
