EDUCATION

Boston University

B.S. in Computer Engineering; GPA: 3.97/4.00

Expected May 2028

Boston, MA

EXPERIENCE

Boston University - Prof. Brian Kulis

Undergraduate Machine Learning Researcher

Aug 2026 – Present

Boston, MA

- Developing a configurable PyTorch retrieval pipeline that converts temporal 2D/3D pose sequences into fixed-length embeddings and automates baseline, robustness, Recall@K, and mAP evaluation.

Banca Mediolanum

Software & AI Engineering Intern, Customer Knowledge

Jun 2026 – Aug 2026

Milan, Italy

- Owned an internal AI-agent runtime, streaming enterprise chat application, and prompt/evaluation platform from architecture through Databricks deployment and stakeholder iteration.
- Designed typed LangGraph/MLflow execution with Pydantic contracts, policy-controlled tools, governed SQL, citation-backed retrieval, request-scoped context, PostgreSQL state, and tracing.
- Delivered substantially lower end-to-end latency than Databricks Genie across multi-step, multi-domain benchmarks while maintaining identical accuracy.
- Participated in executive meetings across IT, finance, marketing, and advisory functions, recommending architectures based on performance, feasibility, system design, operations, and cross-department data/resource requirements.

Boston University Men's Rowing

Software Engineer

Jan 2026 – May 2026

Boston, MA

- Built and deployed a Next.js, Supabase, and Prisma training platform for 50 athletes and coaches with role-based access, proof validation, reporting, leaderboards, and scheduled email automation.

Societa Cappelletto S.r.l.

Software Engineer

May 2025 – Oct 2025

Treviso, Italy

- Rebuilt an Electron application in Tauri, React, and Rust, reducing size by 70%, memory use by 80%, startup time by 60%, and Shopify search latency by 43%.
- Implemented concurrent GraphQL search, multi-location reconciliation, Firebase audit history, GitHub Releases distribution, and automatic updates.

TickIT GmbH

Frontend & Backend Engineer

Nov 2024 – Feb 2025

Remote

- Built Ruby backend services and Next.js/TypeScript interfaces across a 150,000-line platform as part of a four-engineer remote team.
- Implemented QR ticket generation and validation, purchasing and sharing flows, payments, and organizer analytics and forecasting dashboards.

SELECTED PROJECTS

NoteWorthy | GitHub

Next.js, Docker, Cloud Run

- Built a streamed multimodal notes-to-LaTeX application with OAuth, guarded server routes, configurable compilation backends, and PDF/source export.

Deskinator - Autonomous Desk-Cleaning Robot | GitHub

Python, Raspberry Pi

- Built sensor filtering, geometric boundary inference, coverage planning, motor control, telemetry, and reproducible simulation tooling for an autonomous tabletop robot.

LEADERSHIP & ATHLETICS

Boston University Men's Rowing | NCAA Division I Student-Athlete | Sep 2024 – Present

- Freshman Student-Athlete of the Year (2025); Most Improved Oarsman (2026).

SKILLS

Languages: Python, TypeScript/JavaScript, Rust, C/C++, SQL, Ruby, Java

Backend/Systems: FastAPI, Node.js, Ruby on Rails, Tauri, GraphQL, SSE, OAuth, role-based access control

Data/Cloud/Tools: PostgreSQL, Databricks, Supabase, Prisma, Firebase, Docker, Google Cloud Run, Vercel, Git
