Walleye Capital New York, NY June 18, 2026

Dear Walleye Capital Hiring Team,

I am excited to apply for the Technology Intern position for Summer 2027. I am a Computer Engineering student at Boston University with a 3.97 GPA, and I have built software across data platforms, internal tools, full-stack systems, and applied AI workflows. Walleye's Technology internship stands out to me because it combines hands-on system development with the business context, reliability standards, and collaborative execution needed in a platform-driven investment firm.

At Banca Mediolanum, I have been building infrastructure for enterprise LLM-agent prompt governance, including versioned storage, retrieval-augmented search, semantic benchmarking, and evaluation workflows. This work uses Python, SQL, Databricks, Unity Catalog, Delta tables, Vector Search, and MLflow GenAI Evaluation, and it requires careful attention to data quality, traceability, and usability for both technical and non-technical stakeholders. It has given me direct experience turning ambiguous requirements into maintainable tools that support real operational workflows.

I have also owned production-oriented software outside the classroom. I rebuilt an inventory platform using Tauri, React, Rust, Firebase, and Shopify GraphQL, improving performance while maintaining API integrations, search, modification history, and multi-location inventory workflows. At TickIT, I contributed across Next.js, React, Ruby on Rails, and PostgreSQL, building product interfaces and backend features in a collaborative development environment. These experiences align with Walleye's emphasis on system development, project planning, code review, testing discipline, and clear communication from design through delivery.

I bring the same execution standard to technical teams that I bring to Division I rowing: consistency, accountability, fast feedback, and strong collaboration under pressure. I am especially interested in building technology that improves how teams analyze information, automate work, and make better decisions.

Thank you for your time and consideration. I would be grateful for the opportunity to contribute to Walleye Capital as a Technology Intern.

Sincerely,

Giacomo Cappelletto
