EDUCATION

Boston University

B.S. in Computer Engineering; GPA: 3.97/4.00

Expected May 2028

Boston, MA

EXPERIENCE

Boston University - Prof. Brian Kulis

Undergraduate Machine Learning Researcher

Aug 2026 – Present

Boston, MA

- Developing a configurable PyTorch experimentation and retrieval pipeline for temporal embeddings, baseline comparison, corruption testing, and automated Recall@K and mAP evaluation.

Banca Mediolanum

Software & AI Engineering Intern, Customer Knowledge

Jun 2026 – Aug 2026

Milan, Italy

- Owned an internal AI-agent runtime, enterprise chat application, and prompt/evaluation platform from architecture through deployment and stakeholder iteration.
- Designed typed LangGraph/MLflow execution with Pydantic contracts, policy-controlled tools, governed SQL, retrieval, request-scoped context, evidence review, structured UI events, and tracing.
- Delivered substantially lower end-to-end latency than Databricks Genie across multi-step, multi-domain benchmarks while maintaining identical accuracy.
- Participated in executive meetings across IT, finance, marketing, and advisory functions, recommending architectures based on performance, feasibility, system design, operations, and cross-department data/resource requirements.

Boston University Men's Rowing

Software Engineer

Jan 2026 – May 2026

Boston, MA

- Built and deployed a configurable Next.js, Supabase, and Prisma product for 50 athletes and coaches with role-based workflows, proof validation, reporting, and scheduled automation.

Societa Cappelletto S.r.l.

Software Engineer

May 2025 – Oct 2025

Treviso, Italy

- Migrated an Electron application to Tauri, React, and Rust, reducing size by 70%, memory use by 80%, startup time by 60%, and search latency by 43%.
- Built concurrent GraphQL search, Firebase audit tooling, multi-location reconciliation, GitHub Releases distribution, and automatic update workflows.

TickIT GmbH

Frontend & Backend Engineer

Nov 2024 – Feb 2025

Remote

- Built core functionality across a 150,000-line Ruby and Next.js platform in a four-engineer team, shipping QR ticketing, payments, analytics, and operational dashboards.

SELECTED PROJECTS

MOVE Enterprise AI Platform

LangGraph, MLflow, Databricks

- Built a governed agent runtime, typed streaming response contract, evaluation harness, traceable SQL/document tools, versioned prompts, and deployment workflows with explicit authority boundaries.

NoteWorthy | GitHub

Next.js, Docker, Cloud Run

- Built a streamed multimodal generation workflow with OAuth, guarded server routes, configurable compilation backends, PDF/source outputs, and production deployment.

LEADERSHIP & ATHLETICS

Boston University Men's Rowing | NCAA Division I Student-Athlete | Sep 2024 – Present

- Freshman Student-Athlete of the Year (2025); Most Improved Oarsman (2026).

SKILLS

Languages: Python, TypeScript/JavaScript, SQL, Rust, Ruby, C/C++

Agent/Backend: LangGraph, MLflow, Pydantic, FastAPI, Node.js, Flask/Dash, SSE, React, Next.js

Platform/Tools: Databricks, PostgreSQL, Supabase, Docker, Google Cloud Run, Vercel, Git/GitHub, GitHub Releases
